ABSTRACT

The Filipino-Amercian School Town Enrolment Management and Website, was develop to purposely provide the FAST (Filipino-American School Town) a statistical tool that is available online to aid their current operation as to assist them in the aspect of data and file manipulation. It will provide the FAST a way to improve developmental activities as well as analysis and evaluate the improvement that may be needed.

The system is developed with the Admin that will become main operator of the whole system. Thus, its database resides on the same location, as to provide the service once upload over the main website.

As data import and export is the primary function f this system, this has been utilized through the use of the general system theory unto which posits everything a system in the sense the concept system can be applied in a meaningful and practical sense.

The FAST website is composed of 6 module, namely, File Transfer, Editing, Notification, Profiling, Upload, and Search. It provide a user a user interface that is experience the convenience that they intended to have.

With the features presented above, this will help the FAST having their data available anytime.
