ABSTRACT

This study aims to provide solutions for the Metrolink Pharma Phils., Inc. ordering process in use for their business transactions. It shows online flexibility, how it speeds up the ordering of pharmaceutical products and how it creates new business process for a starting company having to adopt the E-commerce technology. With the use of the Internet, a business will be connected to other businesses; together they can put up a great marketing strategy. There are many businesses that use this web technology, all these that the research team had studied could take advantage of what the technology can bring, giving less burden for the clients of Metrolink Pharma Phils., Inc. in placing their orders.
